

Camera: IP3M-941B

Camera Firmware: Amcrest_IPC-AWXX-V2_Eng_NP_AMCREST_V2.620.00AC00.3.R.20191218

Set-up interface: Chrome on Windows 7 Pro

Router make/model: Asus RT-AC51U, latest firmware.

Dear all,

Further to my inquiry about the possibility to specify the recording time after a triggered motion event, I kindly ask for answers to the following:

- 1) Menu item: Event\Video Detection\Motion Detection

Anti-Dither What is the purpose of this parameter ?

- 2) Menu item: Storage\Record Control

Pack Duration What is the purpose of this parameter ?

Record Mode What is the purpose of this parameter ?

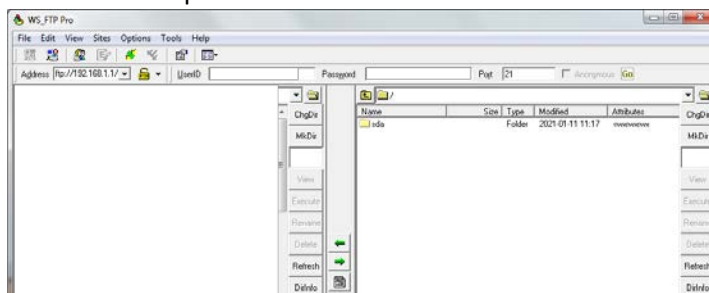

- 3) Menu item: Storage\Destination\FTP

Remote Directory What is the syntax for this parameter?

No matter what I enter here I always receive this error message:

"FTP server test failure; user read only right".

Funny this is that I have no problem connecting to this LAN FTP server (provided by my Asus router) using ordinary FTP software, refer to below picture.

From within my router web interface, the USB directories look like this:

As you can see, the directory I'm trying to enter from within the Amcrest Web-interface is:

/sda/staffan

But, no matter what I try to enter here there is no way to make it work.

Yes, I know that this is an old shortcoming of the IP3M-941B firmware, but should this not have been resolved after all these years 😊 ???

I know I'm asking for a lot, but he who asks no questions
Receives no answers at all 😊

Many thanks for any comment on the above.

Kind regards,

Staffan
